## CellSearch™

### Now Available

First FDA approved test to identify circulating tumor cells in metastatic cancer patients

#### Clinical Utility:

- Prediction of progression-free survival (PFS) and overall survival (OS) in patients under therapy for metastatic breast, prostate and colorectal cancer.
- Assistance in the management of metastatic breast, prostate and colorectal cancer patients.

#### Appropriate Individuals for Testing:

- Metastatic cancer patients initiating a new line of therapy.
- Metastatic cancer patients at any follow up.

## StrataFLEX™

Management of patients with cancer requires a rational approach to reduce treatment costs, provide effective therapy, and predict and prolong survival.

The CellSearch System is one component of MPLN's comprehensive StrataFLEX approach to cancer diagnostics, prognosis and therapy selection.

To order the CellSearch Circulating Tumor Cell Test, follow the simple steps below:

### Step 1

#### Specimen Requirements and Handling:

- Collect 10mLs of blood in two CellSave® preservative tubes enclosed. (Do not collect while IV is being administered. Do not collect within 7 days of doxorubicin (Adriamycin) therapy to prevent interference.)
- Gently invert the two tubes 8 times after draw, and transport at room temperature. (Never refrigerate tubes.)
- Specimen must be tested within 96 hours of draw. (Ship promptly to arrive next morning.)

### Step 2

#### Contact Molecular Pathology Laboratory Network, Inc:

- If you have an account with MPLN, complete the necessary requisition form(s), ship per usual method and contact us at **800.932.2943** to provide the tracking number.
- If you do not have an account with MPLN, please contact us and we will provide you with details to order the CellSearch Circulating Tumor Cell Test.
- For more information, contact us at **800.932.2943**.

## About MPLN

Since 1989, MPLN has offered an expanding selection of molecular diagnostic and cytogenetic services and testing that targets specific medical specialties, including hematology/oncology, pathology, obstetrics and gynecology, medical genetics, gastroenterology, infectious disease and internal medicine.

Headquartered in Maryville, Tennessee, MPLN is a fully licensed laboratory certified by the Clinical Laboratory Improvement Amendment and accredited by the College of American Pathologists, and the states of Tennessee, Maryland, Florida and New York.

StrataFLEX™ is a trademark of Molecular Pathology Laboratory Network, Inc. CellSearch™ is a trademark of Veridex, LLC and CellSave® is a registered trademark of Immunivest Corporation.
